

What is new on the T4A GPS Maps – Traveller's Africa 23.10

T4A GPS Maps 23.10 comes preloaded on a **micro SD** card with standard adapter, ready for **Plug & Navigate**. This SD card can be used on most map capable **Garmin** units and has been tested with latest Drive models as well. ***This product is not compatible to iGO in car navigation systems, Android or iOS devices.***

The SD card also contains **installation files for PC and Mac** users who want to install the maps on their computers for trip planning or for transferring maps to older Garmin units such as the 276c, 76csx, previous generation eTrex, etc.

The map growth is organic in nature. We processed **357 data submissions for version 23.10**. These data submissions not only contribute more roads and POI's to the map, it also improves the quality of existing data by means of corrections. The overall road coverage has increased by **0.6%** from **23.05**.

Change log from selected data submissions

Our focus on **Zimbabwe** continues as we are researching the country for our new self-drive guide. Many services are being added across the country. We are also in the process of updating the road networks of the parks. These areas have now been driven by our staff and most of the updated information will be reflected in this version.

In **East Africa** we updated the campsites since we received many reports from travellers that old campsites were no longer in use. We suspect that this is an effect of the lockdown period and that over time these campsites may open again. For now we removed the ones we could not confirm.
