

What is new on the T4A GPS Maps – Traveller's Africa 26.05

See note about new map style!

T4A GPS Maps 26.05 comes preloaded on a **micro SD** card with standard adapter, ready for **Plug & Navigate**. This SD card can be used on most map capable **Garmin** units and has been tested with latest Drive models as well. ***This product is not compatible to iGO in car navigation systems, Android or iOS devices.***

The SD card also contains **installation files for PC and Mac** users who want to install the maps on their computers for trip planning or for transferring maps to older Garmin units such as the 276c, 76csx, previous generation eTrex, etc.

The map growth is organic in nature. We processed **339 data submissions for version 26.05**. These data submissions not only contribute more roads and POI's to the map, it also improves the quality of existing data by means of corrections. The overall road coverage has increased by **0.3%** from **25.10**.

Map Coverage

- **1 475 673km** of roads, detailed tourist coverage and fully navigable (0.3% increase from 25.10)
- **290 791** points of interest (0.3% increase from 25.10)
- Most complete and detailed **protected areas (national parks, game reserves, private nature reserves etc.)** in Africa – **2 202 parks** in total.
- **20 680 accommodation** listings (0.3% up from 25.10)

- **4 745 camp sites**, **the most complete camping data base in Africa**
(2.6% down from 25.10 – as a result from cleaning up old data.)
- **9 737 places to eat or drink** (up 0.2% from 25.10)
- **15 588 fuel stops** (0.2% down from 25.10)

Map Style Update!

The map style we have used over more than a decade has been updated to accommodate the changes in newer GPS models. The problem we face is the decluttering of the GPS map screen which results in minor roads and tracks being very faint. Since our focus is specifically to highlight remote areas we felt the need to adapt the map style to show on these devices with more definition. The unintended result is that the map style on Basecamp is compromised. The lines on Basecamp will show a lot thicker than before and some users may not want to use this for planning purposes. We have therefore created an installer that will allow users to still load the old map style for use on Basecamp and their GPS should they wish to do so. The default map will use our new style.

Change log from selected data submissions

You will notice a **decrease in our campsite** listings. This is the result of a data cleanup. Older listings that could not be confirmed were removed from the map.

Our research focus has shifted to the **Northern Cape around Richtersveld and the Namakwa Eco Trail** in **South Africa**. We will produce a highly detailed paper map of this region and as a result we have sent a research team to do on the ground research. Expect many updates in relation to points of interest and road conditions together with access.

Tracks4Africa 26.05 Specific Updates

General

- Focus on Northern Cape in preparation for our new regional paper map.
- General data cleanup to get rid of old listings.
- Zambia new roads and speed updates
- Zambia lodging and camping updates
- Lesotho roads updates (new Esiphola Pass added)

Cities and Towns

- Windhoek ring road update from the Hosea Kutako International Airport
- eNtokozweni (Machadodorp) road and POI updates
- Midrand (Gauteng) road and points of interest updates
- Rawsonville (Western Cape) road updates
- Tuli Farms (Botswana) updated
