

What is new on the T4A GPS Maps – Traveller's Africa 26.10

T4A GPS Maps 26.10 comes preloaded on a **micro SD** card with standard adapter, ready for **Plug & Navigate**. This SD card can be used on most map capable **Garmin** units and has been tested with latest Drive models as well. ***This product is not compatible with iGO in car navigation systems, Android or iOS devices.***

The SD card also contains **installation files for PC and Mac** users who want to install the maps on their computers for trip planning or for transferring maps to older Garmin units such as the 276c, 76csx, previous generation eTrex, etc.

The map growth is organic in nature. We processed **101 data submissions for version 26.10**. These data submissions not only contribute more roads and POI's to the map, it also improves the quality of existing data by means of corrections. The overall road coverage has increased by **0.1%** from **26.05**.

Map Coverage

- **1 476 757 km** of roads, detailed tourist coverage and fully navigable (0.1% increase from 26.05)
- **292 662** points of interest (0.6% increase from 26.05)
- Most complete and detailed **protected areas (national parks, game reserves, private nature reserves etc.)** in Africa – **2 206 parks** in total.
- **20 373 accommodation** listings
- **4 664 camp sites**, **the most complete camping database in Africa** (1.7% down from 26.05 – as a result of cleaning up old data.)

- **9 802 places to eat or drink** (up 0.7% from 26.05)
- **15 576 fuel stops** (0.1% down from 26.05)

Change log from selected data submissions

You will notice a **decrease in our campsite and lodging** listings. This is the result of a data cleanup. Older listings that could not be confirmed were removed from the map.

Our research focus has shifted to the **Northern Cape around Richtersveld and the Namakwa Eco Trail** in **South Africa**. We will produce a highly detailed paper map of this region and as a result we have sent a research team to conduct on-the-ground research. Expect many updates in relation to points of interest and road conditions together with access.

We are also researching the entire **Angola** with the aim of creating a country paper map in 2027. We currently have a research vehicle in the country and the field survey results will flow into the data over the next couple of months.

Tracks4Africa 26.10 Specific Updates
